CAREER EXPERIENCE

- **Coordinator at the Young Haitian Authors Workshop   (Delmas, Ouest, HAITI)**
  March 2018 - August 2018
  My job was to help writers aged 12 to 18 write texts while being at home via google Docs to be able to complete a book that was published at Livres en Folies in 2019.
- **Website Manager at the PEET   (Tabarre, Ouest, HAITI)**
  January 2020 - May 2022
  With the webhost Hostinger I was responsible for the coding and the management of the website. For a better organization of the platform, I used Wordpress and Wix to be aware of certain plugins, Google Analytics to be able to control the users who enter and leave my website and to know which categories to classify them, Google Adsense and Facebook Ads to be able to make targeted advertisements from the data collected from Google Analytics to reach more people with
- **Database Administrator at The PEET   (Tabarre, Ouest, HAITI)**
  January 2020 - May 2022
  I managed the database created with MySQL via PHPMyAdmin to collect requests and requests securely and reliably that users gave us via the platform or by Email with the Titan Mail Account platform and thus their feedback about our services to better progress of our services. And I also use some knowledge in cybersecurity to be able to avoid all forms of malicious web intrusion. Software like SSL Certificate, Firewall and two-factor authentication.
- **Intern at SAP Cybersecurity   (USA)**
  March 2022
  My job was to secure some employee accounts while ensuring that the passwords met the criteria of SAP's corporate policies and then analyze incoming mail to ensure that there is no PHISHING MAIL to prevent malicious software on the corporate network from computer attacks.
- **Intern at MASTERCAD NY CEO JOBS COUNCIL   (New York, USA)**
  March 2022
  My job was to filter emails to avoid spam that lands in users' mailboxes and prevent them from malicious users. They were also taught how to differentiate between professional corporate emails to the detriment of forgers used by scammers and other malicious users to steal data.
- **Mathematics Teacher and Computer Science teacher**
  March 2020 – April 2023

To do the courses, sometimes I used two platforms to try to accommodate myself to new technologies among which: MOODLE and Google Classroom to compensate for the instability which prevented the courses from functioning normally. And sometimes I used the website of The PEET when it was online.

- **Website Designer, Newsletter Editor, Database Administrator at Mosaic Group**
  December 2023 – Current
  As a Website Designer, Newsletter Editor, and Database Administrator at Mosaic Group, I am responsible for designing and maintaining the company website, ensuring seamless user experience and functionality. I also oversee the creation and distribution of newsletters, crafting engaging content to keep our audience informed. Additionally, I manage and optimize databases, ensuring efficient data storage and retrieval to support company operations.
